Education

University of California, Los Angeles   **Expected Graduation: June 2025**
Bachelor of Arts in **Linguistics & Computer Science**
Relevant Coursework: Data Structures and Algorithms, Computer Organization, Software Construction Lab

Skills

- **Programming Languages:** C++, Java
- **Frameworks:** React

Projects

To Do App   **April-August 2022**
- Using TypeScript to build a Chrome extension feature that extracts keywords from Gradescope (course submission website) to determine how long it takes for a student to complete their assignments
- Chrome extension scrapes Gradescope and UCLA's course website to estimate the time needed for a student to complete their pending assignments and to prepare for their exams

Our Meal App   **November 2021**
- Used React JS, HTML and CSS to develop the page that displayed a user's meal plan
- Utilized the University of Michigan Dining Hall API to fetch data and load the dining hall with their corresponding menus filtered by day of the week

Basketball Recruiter App   **June 2021**
- Used React Native to implement the event registration function that sends users reminder emails about sports events they registered for
- App designed for athletes, coaches, parents, and college recruiters to access player and basketball event information, as well as contact information for coaches in the local high school attendance area

Experience

Director of Technology, Model United Nations at UCLA   **May 2022-present**
- Updated the two websites to ensure satisfactory user experience and to give the website a good design
- Led the Google Workspace transition for the club after acquiring nonprofit status, ensuring that there was no disruption to the club's order of business
- Websites: https://www.uclamun.org/ and https://www.bruinmun.org/
